

ARCHITECTURAL PRODUCTS AND SERVICES

Good Directions Group

Good Directions
GROUP OF COMPANIES

We are a family owned British company founded in 1988 by husband and wife Robin and Trish Davies from their house in Botley. Initially importing and selling weathervanes the business quickly expanded its product ranges and started producing and selling clocks and cupolas. By the early 90's the company moved into new premises and the product ranges kept growing. Over the years our name has gained a worldwide reputation for the design, manufacture, restoration and installation of exterior clocks, architectural GRP and metal features which can be found in nearly every city throughout the UK and in many other countries.

We have both in-house design and manufacturing expertise and capabilities unrivalled by most of our competitors, offering customers, architects, contractors and designers a single point source for their architectural features requirements. Our team of over twenty staff pool skills and knowledge from a wide array of backgrounds and many years of work experience that enables us to offer a tailored service to suit our customers needs.

We also work closely with creative partners to design and manufacture architectural features or collaborate on historical architectural restorations including process and material specifications to ensure works are in-keeping with or replicas of original features that may be missing entirely or in a state of disrepair.

The Good Directions Group companies comprises of divisions:

- **Good Directions**
- **Hawkins Clock Company**
- **Shire Clocks**
- **METAL GUTTA**
- **Neptune Street Furniture**
- **TWN GRP**
- **GD Fabrications**
- **ARCHIREST**
- and our associates at **Fain Redfern**

ARCHITECTURAL FEATURES BY

Good Directions

CLOCKS - CUPOLAS - GRP STRUCTURES - WEATHERVANES - FINIALS

Good Directions - Clocks

- Suitable for interior and exterior use
- 300mm to 5000mm diameter
- Wall mounted, projecting, hanging or free standing design options

- Light weight and virtually maintenance free
- Roofs / Domes
- Canopies / Dormers
- Minarets
- Columns
- Finials / Weathervanes
- Architectural Features

Good Directions - GRP Structures

METAL RAINWATER SYSTEMS BY

METAL GUTTA

Copper - Stainless Steel - Zinc

METAL GUTTA - COPPER

Copper looks elegant against any building material and is virtually maintenance free.

Copper Guttering will naturally age to a verdigris patina over time or can be treated to achieve this finish within hours.

Water features / flashings / copings / sills / fascias / valleys can all be manufactured.

METAL GUTTA - COPPER

METAL GUTTA - COPPER

METAL GUTTA - STAINLESS STEEL

A hard durable material with a natural unfinished light metallic grey surface gives this gutter an ultra modern appeal.

Our Stainless Steel guttering systems are very hard wearing and virtually maintenance free.

Water features / flashings / copings / sills / fascias / valleys can all be manufactured.

METAL GUTTA - ZINC

Like our Copper guttering our Zinc gutters suit a multitude of building fabrics.

Supplied in its natural light silver form, Zinc will age over the coming months darkening to a beautiful grey colour.

Water features / flashings / copings / sills / fascias / valleys can all be manufactured.

BESPOKE SOLUTIONS BY
GD Fabrications

Metal - Wood - Slate - Granite - Glass - Gilded - LED

GD Fabrications - Signage

- Fascia, projecting and wall mounted signs
- Working in all types of materials including metal, wood, glass and slate
- LED illumination
- 23 1/2 carat gold leaf
- Integrated clocks
- Full design and installation service

GD Fabrications - Signage

GD Fabrications - CNC Manufacturing

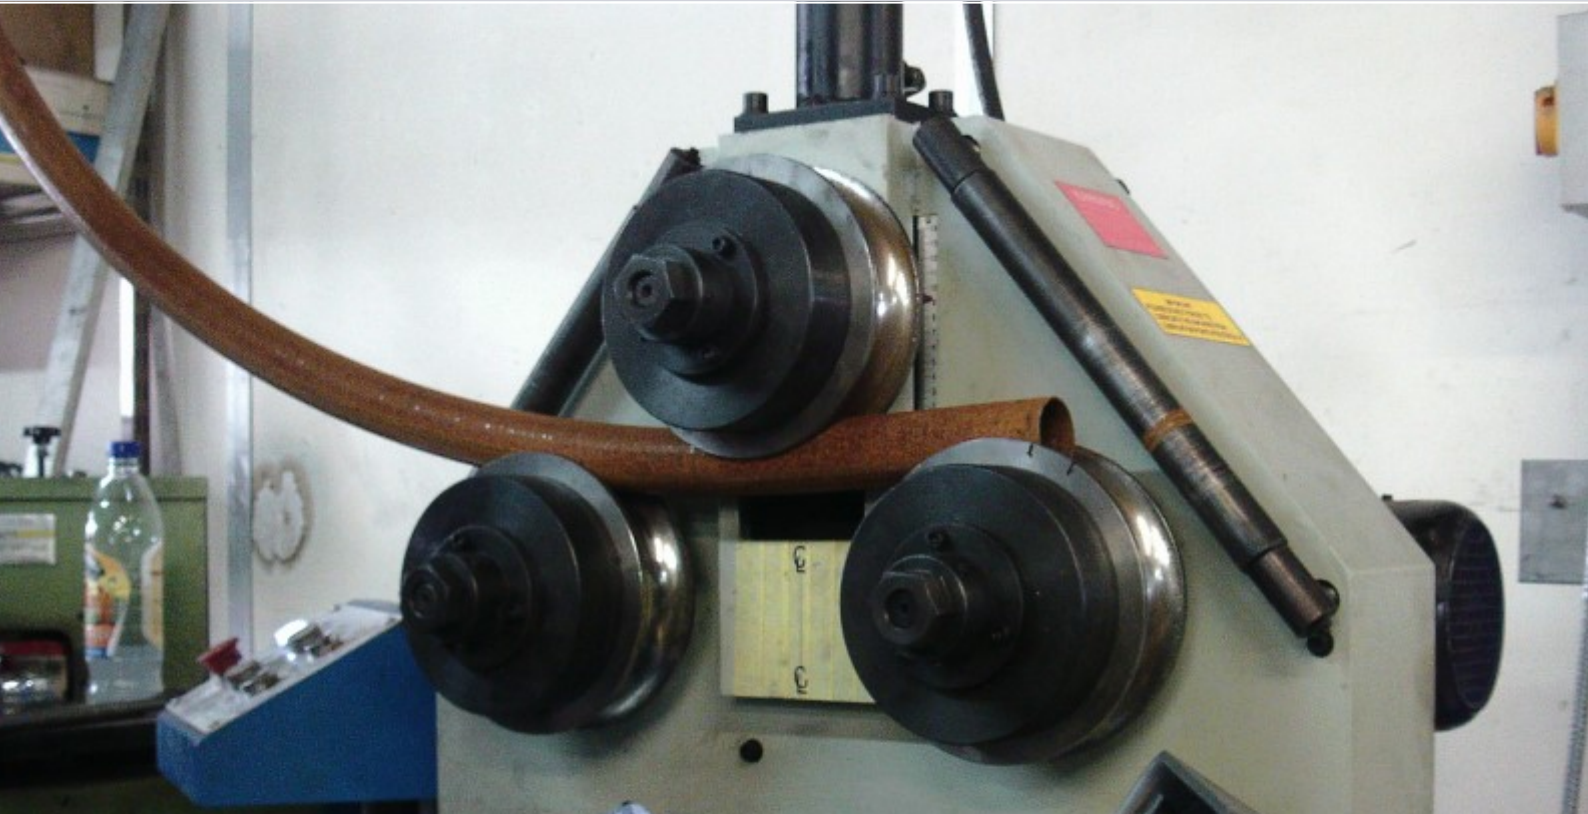

With highly skilled precision engineers, welders, sheet metal fabricators and our in house design facilities with both 2D and 3D CAD CAM software we provide an unbeatable service.
